Exchange

Access the new Baltic Exchange App

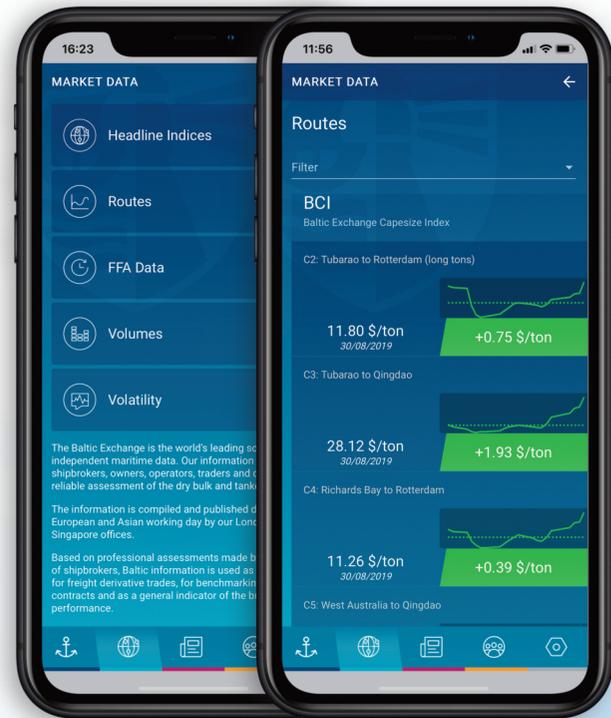

The Baltic Exchange has launched a new mobile App for Members and subscribers to its data. This provides instant access to a wide range of Baltic information including rates, fixtures, Member contacts, news and much more.

Designed for Android and iOS, access to the App is part of your membership or subscription package.

Key features include:

- Live market data, including all historical Baltic indices & assessments and charts
- Live and historical FFA data, including forward assessments and volumes
- Member search facility. All company and individual contact details easily accessible
- Market intelligence including daily & historical fixtures, market reports, circulars and news
- Listings of all Baltic Exchange meetings, social and educational activities
- Users can customise data notifications to receive the information they need as it's published

Market data

The Baltic's full suite of spot dry, tanker and gas assessments are now instantly available. Also accessible are weekly sale & purchase and recycling assessments. The App allows the user to quickly and easily view and graph the markets with a couple of clicks.

Any index or route can be added to "Favourites" for immediate access and set up as a push notification so that data is delivered to your device as soon as it's available.

FFA data

All Baltic Forward Assessments can be viewed in chart format. Useful data such as weekly volumes, open interest and volatility can also be accessed.

Intelligence

All of the Baltic's intelligence services can be accessed via the app. A key feature is the comprehensive dry cargo fixture database which contains fixtures dating back to 2016. All circulars covering index and route changes are offered as are weekly tanker and dry bulk market reports. A calendar containing details of all Baltic Exchange related events is also on hand. Users can choose to receive intelligence notification alerts.

Membership directory

The Baltic's 3,400 plus members can now be easily found and contacted via the App. An easy to use search facility brings up each company's member employees and their direct contact details including phone and email. Features include click to dial and a link to Google Maps for any company.

How to access the App

The new Baltic App is available on both the Apple Store and Google Playstore – simply download from one of these.

When you first open the App, you will need to register using your existing Baltic account and enter your personal corporate business email address and set up your password.

Your details will then be passed to the Baltic admin site for verification and access. You should receive an email confirming this within 24 working hours.

The App is available only to members and subscribers to balticexchange.com – access is available to individuals who are registered with the Baltic Exchange as part of their corporate membership.
